Year 7 Mathematics Learning Journey: Unit 11 - Constructing and Measuring

Step 17: Draw pie charts Steps 15 and 16: Step 14: Construct more complex polygons Interpreting pie charts What angles would represent these frequencies in a pie chart? Is it possible to construct If one part of two different an irregular polygon with pie charts are the same Manufacturer Frequency size, do they represent equal angles? Volvo 10 the same frequency? **BMW** Steps 12 and 13: 16 Ford 11 Kia Construct triangles -SSS, SAS, ASA Steps 9 and 10: Why can you not Step 8: Parallel and Step 11: Identify construct a triangle with Recognise triangles Step 7: Draw and side lengths 4cm, 5cm perpendicular lines and quadrilaterals polygons measure 1800 to 3600 and 11cm? When are two lines When is a polygon L What property does Draw an angle of 2580 perpendicular? every quadrilateral regular? from a horizontal line. share? Steps 5 and 6: Measure and draw Step 3: Angles as a angles up to 1800 Step 2: Line segments measure of turn Step 4: Classify angles How do we know which What is the difference A diver performs a dive with scale to use when How do we illustrate that between a line and a line drawing and measuring two and a half turns. How an angle is 90°? angles on a protractor? segment? many degrees do they rotate through? I Achievement I resilience SHUTTLEWORTH @
