

Year 10 Mathematics Learning Journey: Unit 5 - Algebraic Representation

Step 4: Representing inequalities

On a graph, what's the difference in meaning between a dotted line and a solid line that border a region?

Step 2: Interpret other graphs

Why is there no y value for $x = 0$ on the graph $y = \frac{1}{x}$?

Step 3 (H): Simultaneous equations

What do you know about the values of x and y at the point of intersection of the two graphs?

Step 1: Quadratic graphs

Are all quadratic graphs symmetrical?
