

GEOGRAPHY

Claire Morrison

Curriculum 2022-23

Key Stage 3

In Key Stage 3, students study a balanced mixture of physical and human geography.

In Year 7, topics include 'Global Explorer' – an in depth look at geographical skills that are key to success in KS3 Geography, Geography Rocks, Tourism, Rivers and finally Resources and Energy.

In Year 8, topics include Weather, Urban Environments, Ice Worlds, Industry and Ecosystems.

In Year 9 topics include Restless Earth, Population and Development, Coasts, Climate, Food.

Assessments take place for each unit of work, for which students will be awarded a percentage grade. Students' key pieces of work are also marked and they are taught how to improve it. Students will sit an exam at the end of the year based on the breadth and depth of that year's curriculum. Homework tasks are set in order to stretch the learning done in class as well as prepare them for future learning.

Students may wish to investigate Geography further using the links on our webpage or they may investigate geographical events on the news.

Key Stage 4

Key Stage 4 students will follow the specification for GCSE AQA Geography.

The course is an equal balance of human and physical geography. Over two years students will study natural hazards, urban areas, physical landscapes (rivers and coasts), global economic issues, ecosystems, and resources. Students may also conduct an enquiry based on fieldwork in the local area.

Students are tested during and after each unit of work, the questions for which are given by the exam board and are, therefore, in line with the expectations of their final exams. Students' class work is also marked and assessed regularly by the classroom teacher. Year 10 mocks take place in the summer and there is a full Year 11 mock in the winter term. The official qualification consists of three papers, two of which are 1 hour 30 minutes long, the third lasting 1 hour 15 minutes. Students could watch the news and consider links to geographical themes. Additional resources can be found using the links on our website.
