

My name is Jax Whaling and I attended Ightenhill Primary School. I wanted to become an ambassador at Shuttleworth College because I want to help people have the best education they can possibly get. I am really proud to wear my ambassador tie.

I am enjoying the curriculum lessons in history, English and also many other subjects across school.

I am really keen to take part in enrichment clubs and there are lots on offer, from sports to book club to cheerleading and even Dungeons and Dragons. The clubs I have signed up for are band, mainly because a lot of my Idols are guitarist many from rock and metal bands. I have also signed up for debate club because I like talking to people and I feel this is a great club to develop confidence and communication skills.

My hopes for the future is that people don't need to fear that they will run out of food or won't fear that they might become homeless. I want a world where people are living in peace, the world won't be damaged by gases or where animals won't be hunted and can roam freely in their own domain but we must work as a team for that but I believe that people can do this.

At Shuttleworth, one of our key values is community and I believe it is really important as we move through school and also in the wider world.

Thanks for listening! I'll hand over to Mia who will tell you more about Shuttleworth.
