

Im Sheree and Im a senior prefect here at Shuttleworth for the value of resilience and wellbeing. Through primary school i was always really quiet. By the time I got to year 7 I was nervous and scared, the first day was daunting. Not many people came from my primary so I was lacking familiarity. From being that scared year 7 in a new place full of people I didnt know, ive grown and learnt to get to know people and im now thriving here at shuttleworth. From years 7 to 11 there's been so many ups and an overall a positive journey which has given me confidence. When I first started here, I never would have thought I'd be here speaking to so many people and doing other assemblies within school. It just shows how far that quiet year 7 has come.

Since being a prefect I've had so many different opportunities, on sports day last year me and my friends ran a tuck shop which was so fun to do. As well as this, I've helped year 7 with their transition over from primary school by hosting a treasure hunt on their first day to help the know their way around the building. By doing this they got to talk to people in their form and understand the layout of the school whilst answering simple questions are the way and gaining points – the top 3 forms got prizes.

Shuttleworth has really helped me from being in year 7 to now, where I am planning for my future after school and it had given me all the confidence I need to get into the job I want which is in the medical field.

Thank you for listening.
